

Multiple Contract Projects / Multi-Category Decisions (MCD)

The Multi-Category Decision (MCD) feature is a powerful way to manage projects with multiple stages, evaluation steps and/or multiple contracts (such as multi-prime projects). Using this feature, you can set up one project to handle complex relationships and allow Vendors to submit bids on one or multiple contracts within a project.

Once the project has closed, Project Owners have the option to split the project into multiple "child" projects, thus allowing more customization and the awarding of multiple contracts or awards based on the required decisions.

To learn more about the MCD feature or to set up a training session, please call or [email our team](#).
